COLLECTIONS

THE PERIOD ORIGINAL SERIES

The most famous ceiling fans of the 19th and 20th centuries

Fantique's **"Period Originals"** collection includes a selection of about 1000 original fans, from various continents, particularly from the former colonies of the British Empire. Produced in such noble and resistant materials as cast-iron, brass and wood and endowed with perfectly reconditioned motors, they've been brought back to their original splendor through meticulous restoration work. Most of the companies that produced them no longer exist, there were about 15 brands and about 40 different models, most of which had 3 blades (though our collection also has 2 and 4-blade models) and range in

diameter from 90 cm for the smallest to 180 cm for the largest.

Almost all the oldest models were produced in the West, between 1890 and 1945 by the most important industries of the era: the European ones were Ercole Marelli, CGE, Siemens, Crompton Parkinson, Kingston, Vickers-Metropolitan, Veritys, meanwhile the American ones were produced by General Electric and Westinghouse.

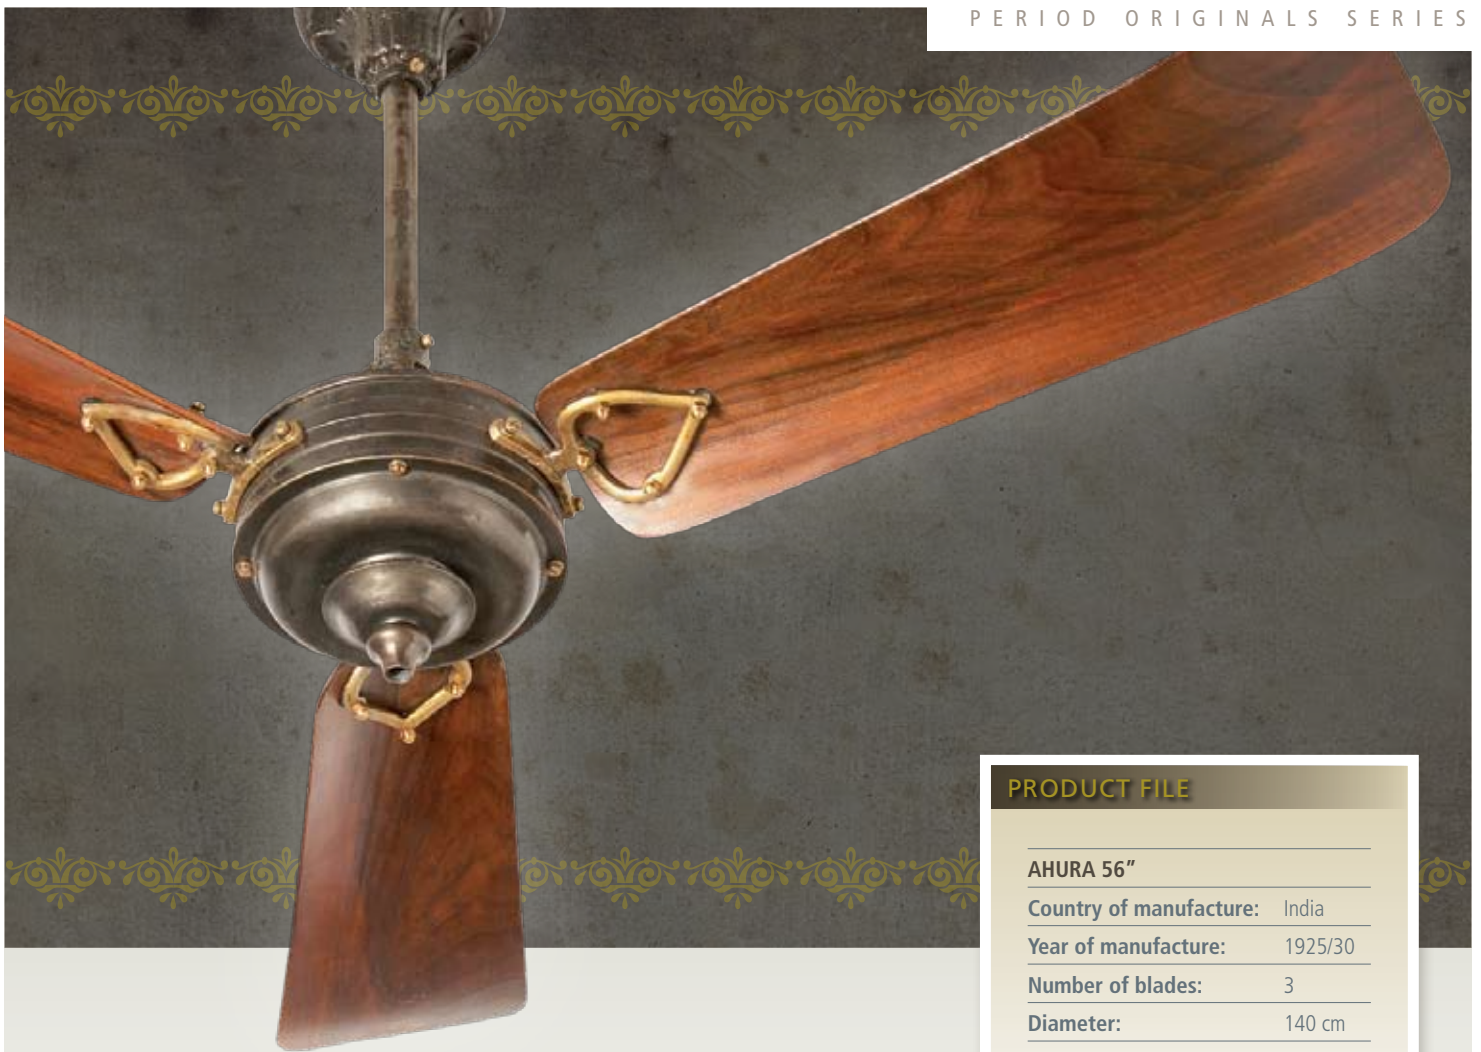

The "more recent" models though came from Indian companies: USHA, India Electric Works, Kassel and Tropical, who began fan production for the English in the decade of 1930-1940.

AHURA 56"

Country of manufacture:	India
Year of manufacture:	1925/30
Number of blades:	3
Diameter:	140 cm
Power:	110 watts
Weight:	19 kg

AHURA 56"

India - 1925/30

Ahura ceiling fans were manufactured in India, on English projects, in the years 1930/1940. Designed for the elegant surroundings of the old colonial mansions, they are characterized by fine and basic lines. Furthermore, thanks to their efficiency, they have been widely used in public places in Mumbai and in the major cities in India.

The Fantique collection consists of several fans with a 56" blade diameter, coming mainly from Southern India and Calcutta (now Kolkata). The Ahura series included two other sizes: a smaller, 36" blade diameter model, as well as a 72", larger one.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Every function is also meticulously tested: from balancing and blades inclination to flow rate, from electric standards to rigorous endurance tests (5 hours at full speed).

Telephone assistance

Our antique fans are mounted in the same manner as commercial models, which is quite simple. We nevertheless recommend that you rely on qualified personnel, to whom Fantique offers telephone assistance free of charge on any issues (not necessarily related to the mounting of the fan), by simply calling the following numbers: +39 06 68802417 or + 39 337 733077.

Year of manufacture:	1930
Number of blades:	3
Diameter:	140 cm
Power:	80 watts
Weight:	19 kg

CGE - VS 56

Italy - 1930

C.G.E., Electricity's General Company, was founded in Milan in 1921 as the Italian branch of General Electric in the U.S.A. Our Fantique collection consists of two models which are among the first manufactured by this Italian firm: the 3-bladed VS 56 and the 4-bladed VS 135/4.

Both high-quality and stylistically extremely refined and elegant, these two models were present in the most prestigious Italian mansions of the time and largely used in the Italian colonies.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. CROMPTON PARKINSON BALL 56"

India - 1940

Crompton Parkinson was a long-established British firm, manufacturing fans both in the UK and the colonies of the empire. Crompton Parkinson Ball 56" and Crompton Parkinson Ball 60" were produced in India around the '40s.

The spherical shape of their engine body inspired the nickname. In addition to the two sizes we have found in India (with blade diameter of cm. 140 and cm. 160) there was also a cm. 120, or 48" model.

GEC KINGSWAY

Country of manufacture:	GB/India
Year of manufacture:	1932/41
Number of blades:	3
Diameter:	150 cm
Power:	100 watts
Weight:	19 kg

GEC KINGSWAY

Gran Bretagna/India - 1932/1941

In 1886 two German immigrants, Gustav Biswanger and Hugo Hirst, founded The General Electric Apparatus Company in London, which three years later became the General Electric Company; it then expanded rapidly, setting up subsidiaries and factories in Europe, Japan, Australia, South Africa, India and South America.

We indeed found models of GEC fans in both Britain and India, still with their original labels. We came across the Kingsway model, a three-bladed fan with a diameter of cm.150, with the "Made in England - 1932" label, as well as with the "Made in India", "War Design and Finish - 1941" label. This demonstrates how the same model was manufactured in different countries.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Every function is also meticulously tested: from balancing and blades inclination to flow rate, from electric standards to rigorous endurance tests (5 hours at full speed).

KINGSTON BIG

Country of manufacture:	GB
Year of manufacture:	1920
Number of blades:	3
Diameter:	160 cm
Power:	120 watts
Weight:	23 kg

KINGSTON BIG

Great Britain - 1920

Based in Portslade, Great Britain, Kingston Engineering Co. was a long-established fan manufacturer which halted its production quite a while ago. Kingston started manufacturing direct-current fans but in the 1920's switched to the production of an alternating-current model, available in two blade diameters: 120 cm and 160 cm.

Because of a limited and geographically circumscribed production, these fans are nowadays very rare and difficult to come by in good conditions. The Fantique collection consists of only one model with 160 cm blade diameter: its large size and weight notwithstanding, the Kingston Big fan stands out for its stylistic grace and balanced proportions.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. IEW BEHALA 48"

India - 1930

In the early 30's, Indian Electric Works was the main manufacturer of fans in India. I.E.W produced many models, equipped with unpretentious but very sturdy engines, and distinguished by simple and essential forms, which were sold in million of pieces.

Behala 48" and Behala 56", the two IEW models part of the Fantique collection, were widespread throughout the East under British influence. Until not long ago, it was a common sight to find them in working conditions in Southern India railway stations (hundreds within Victoria Station, Bombay's main train station), as well as in hospitals, post offices and barracks in the British colonies.

KASSEL 48"

Country of manufacture:	India
Year of manufacture:	1930
Number of blades:	3
Diameter:	120 cm
Power:	80 watts
Weight:	10 kg

KASSEL 48"

India - 1930

Kassel ceiling fans, as well as Tropical fans, came from old Indian medium size manufacturers, whose production was concentrated in a short time period. Such factories were frequently born to satisfy the demand of fans on the part of local governments, and once that attained, they often disappeared.

In spite of this, the product quality is amazing. Kassels are indeed unpretentious, high quality, powerful fans. As they are virtually indestructible, they were mainly used in public places such as railway stations and schools, but also for outdoor purposes, under public arcades and hotel patios. Our Fantique collection includes several fans with a 48" or 56" blade diameter.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. MARELLI - MAESTRALE

Country of manufacture:	Italy
Year of manufacture:	1915
Number of blades:	3
Diameter:	170 cm
Power:	150 watts
Weight:	28 kg

MARELLI MAESTRALE

Italy - 1915

The first Italian ceiling fan manufacturer was Ercole Marelli, in Milan, starting its industrial adventure in 1891 with the production of the so-called "electrical air agitators". At the time, the most popular ceiling fans - most of them American - were both very big and heavy. Marelli built instead a series of alternating-current fans, which were lighter, more elegant and practical, and most of all, more suitable for a domestic use. Its business success was immediate, and within a few years Marelli became one of the largest fan manufacturers in the world.

Around 1915 Marelli released Maestrale, a large-size ceiling fan conceived for huge and wide settings. Inspired to Maestralino (the best selling model of the Italian company), Maestrale is a wonderful 3-bladed fan (170 cm diameter), widely used in many luxury hotels of the British Colonies: in Singapore at Raffles', in Mumbai at Taj Mahal's, (where it could still be admired until not long ago), in Rangoon.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Italy - 1915

The first Italian ceiling fan manufacturer was Ercole Marelli, in Milan, starting its industrial adventure in 1891 with the production of the so-called "electrical air agitators". At the time, the most popular ceiling fans - most of them American - were both very big and heavy. Marelli built instead a series of alternating-current fans, which were lighter, more elegant and practical, and most of all, more suitable for a domestic use. Its business success was immediate, and within a few years Marelli became one of the largest fan manufacturers in the world.

Around 1910, Marelli released the Maestralino model, which soon became the most representative and efficient ceiling fan of the early '900. The Maestralino fan was manufactured in many different versions and diameters, with 3 or 4 blades, and exported worldwide (mostly in the British Empire's Colonies) for decades.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Every function is also meticulously tested: from balancing and blades inclination to flow rate, from electric standards to rigorous endurance tests (5 hours at full speed).

Telephone assistance

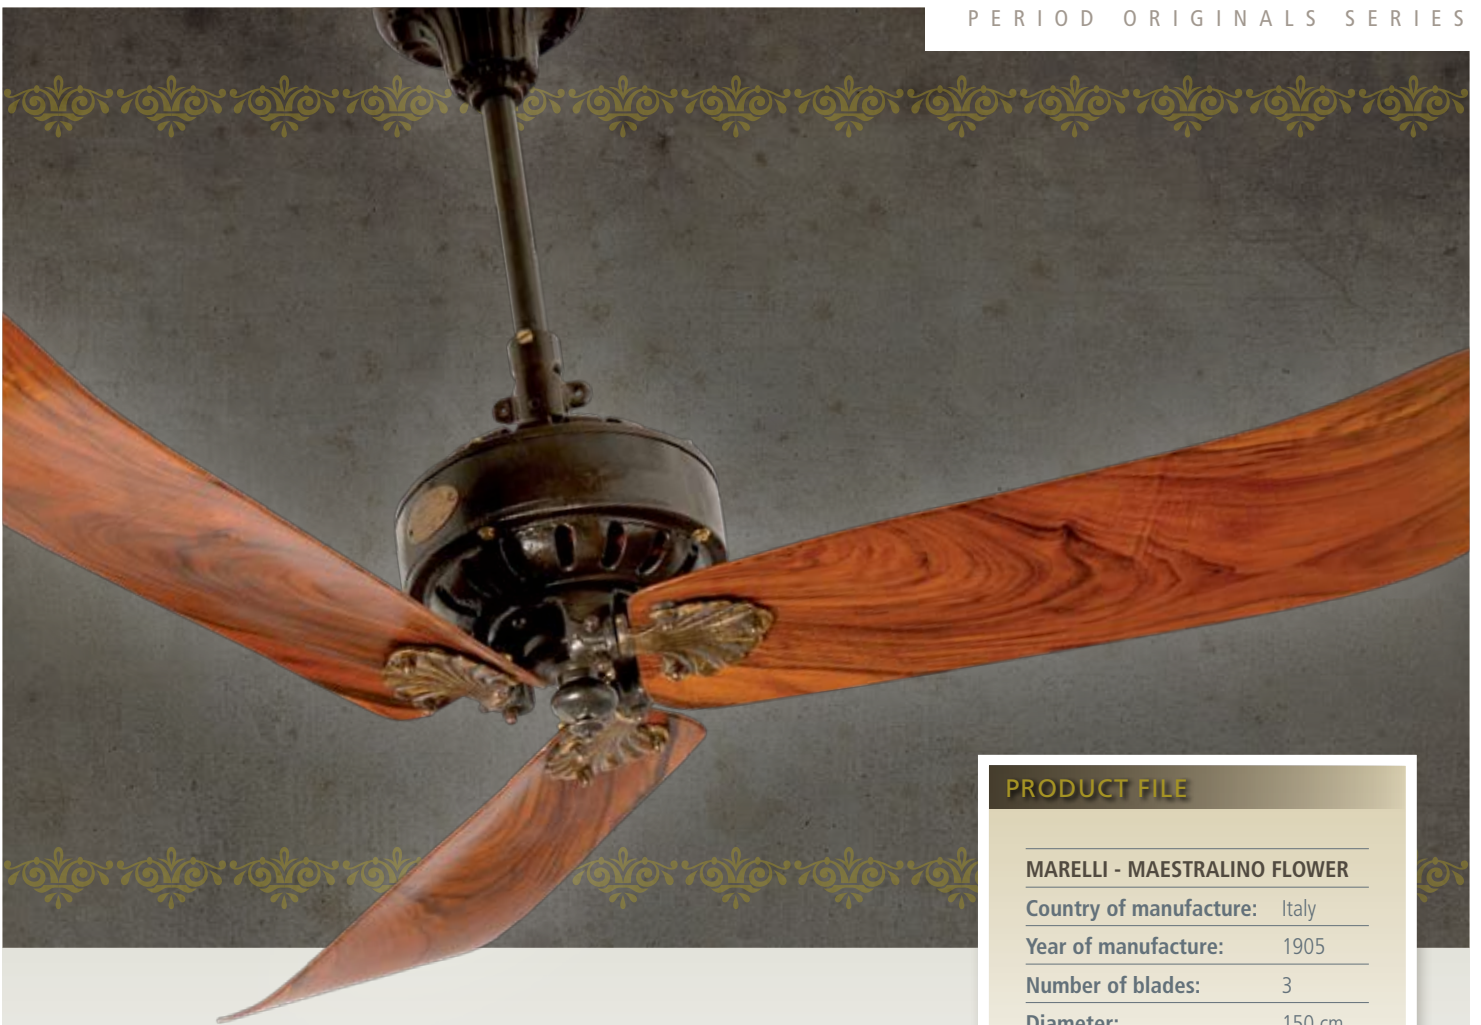

Our antique fans are mounted in the same manner as commercial models, which is quite simple. We nevertheless recommend that you rely on qualified personnel, to whom Fantique offers telephone assistance free of charge on any issues (not necessarily related to the mounting of the fan), by simply calling the following numbers: +39 06 68802417 or + 39 337 733077.

MARELLI FLAT 36"

Italy - 1925

The first Italian ceiling fan manufacturer was Ercole Marelli, in Milan, starting its industrial adventure in 1891 with the production of the so-called "electrical air agitators". At the time, the most popular ceiling fans - most of them American - were both very big and heavy. Marelli built instead a series of alternating-current fans, which were lighter, more elegant and practical, and most of all, more suitable for a domestic use. Its business success was immediate, and within a few years Marelli became one of the largest fan manufacturers in the world.

The "Flat" line, like the previous "Maestralino" line, still featured a cast iron body and solid wood blades, but it was much more linear, and clearly influenced by Art Deco. Flat was the most produced Marelli model, and it was sold between 1920's and 1970's in versions ranging from 36" (90cm) to 72" (180 cm), both 2 and 3-bladed. A proof of its unique quality is that it's still possible to find that model efficiently working somewhere.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. JEW - USHA 36"

India - 1940

Based in Calcutta (now Kolkata), the Indian firm Jay Engineering Works marketed the USHA model around 1940's. Defined by softer and rounder lines, at the time considered more modern, this model was very popular with the public, thus spreading all over the Indian subcontinent, part of the former British Eastern Colonies.

Often used in the most exclusive hotels and restaurants, USHA was manufactured in various blade diameters, such as 90, 140 and 160 cm. (36", 56" and 60"). Our collection includes fans of these three blade diameters, coming from India, Pakistan, Burma, Bangladesh and Sri Lanka.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. TROPICAL 56"

India - 1930

Tropical was an old Indian firm, manufacturing ceiling fans between 1930's and 1950's, characterized by two distinguishing features: very high quality engines and truly essential lines. With an extremely "technical" appearance, they were widely used both in governmental and private buildings.

Our Fantique collection includes several fans with a 56" (140 cm.) blade diameter, the most widespread size found in public offices. Thanks to their powerful efficiency, Tropical ceiling fans are particularly suitable for use outdoors.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. METROPOLITAN VICKERS (WITH LAMP)

Great Britain - 1920

Founded in Birmingham (Great Britain) in 1917 and known as the "British Westinghouse", Metropolitan has been one of the main electromechanical firms of its time. In addition to fans, it manufactured gas and electric turbines, diesel-electric locomotives, trains and even airplanes.

In 1919 the company was bought out by Vickers, thus becoming Metropolitan Vickers Electrical Company, based in Manchester. The Fantique collection consists of 3-bladed, large-size pieces, some still furnished with the original lamp in perfect working conditions.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Every function is also meticulously tested: from balancing and blades inclination to flow rate, from electric standards to rigorous endurance tests (5 hours at full speed).

Telephone assistance

Our antique fans are mounted in the same manner as commercial models, which is quite simple. We nevertheless recommend that you rely on qualified personnel, to whom Fantique offers telephone assistance free of charge on any issues (not necessarily related to the mounting of the fan), by simply calling the following numbers: +39 06 68802417 or + 39 337 733077.
